INTRODUCTION

1888. In France's Jura region, a small company was taking its first steps towards establishing what would become a leading brand in outdoor and winter sports gear. From combs to eyewear, and then pioneering in the ski goggle business, Bollé continues to equip the most accomplished athletes who have come to rely on the style and performance of the brand's products. Bollé's know-how covers a wide variety of sports (Alpine Skiing, Cycling, Golf, Sailing...) and the brand's expertise has marked the industry's history with several revolutionary patents. As a key benchmark in the eyewear industry for the quality and the performance of its products, Bollé's skill was first and foremost to master the design not only of sunglasses, but of era-defining eyewear. From the ground up, Séraphin Bollé and then Georges Bollé created unforgettable lifestyle sunglasses designs such as the famous cat-eye nylon model, a must-have accessory of top celebrities of the period.
130 years of craftsmanship and trend-setting have given Bollé its enviable position today. The brand's inspiration and history shine through today's summer and winter collections, along with a tenacity that has helped it rise step-by-step with unerring commitment to innovation, creativity and quality.

LENS TECHNOLOGY

by bollé

REVEAL THE IN**VISIBLE**

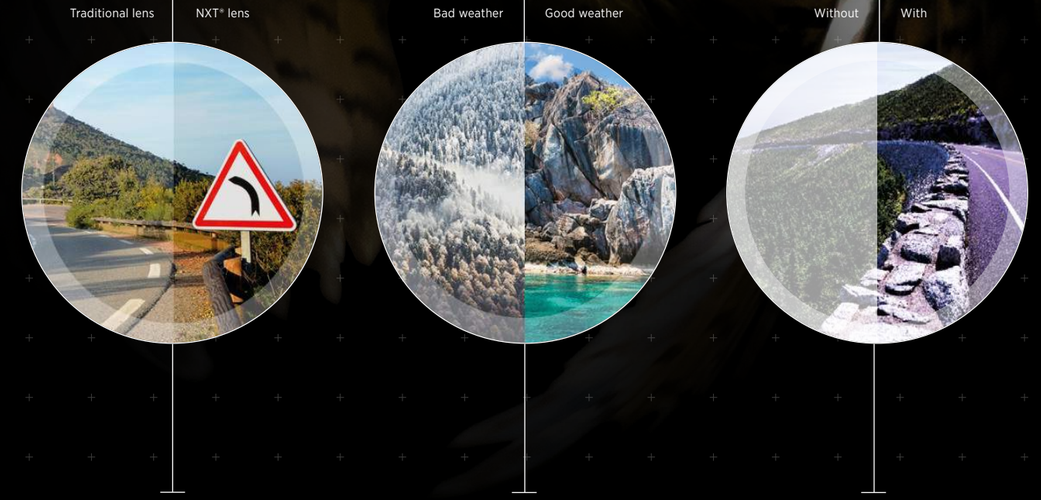
PHANTOM

LIGHT ADAPTIVE LENS TECHNOLOGY

Phantom lens technology - developed in partnership with Essilor® Sun Solution™ - redefines how you see the environment. Industry-leading optical clarity, light-adaptive lens & high contrast filter, allow you to reveal the invisible.

WHAT IS PHANTOM ?

The Phantom lens is a combination of 3 advanced technologies that revolutionize how you see your environment.
Made with NXT® material for enhanced definition and a molecular photochromic filter that adapts to all light conditions.
Also, a high-contrast filter improves color and depth perception.



OPTICAL CLARITY

Made with NXT® material, Phantom lenses raise the optical clarity of our lenses to a new level. NXT® material is packed with a lot of features such as optimal clarity, lightweight, high impact resistance, chemical resistance, and of course 100% UV protection. Ideal for a sport use, Phantom lenses will offer maximum protection & comfort of vision for your eyes.

PHOTOCHROMIC PERFORMANCE

Phantom lens technology adapts to any light condition, ensuring precise visual acuity whatever the weather. The lens tint changes with the light from cat.1 to cat.3.
Enhanced vision whatever the conditions.

HIGH CONTRAST

Bollé has advanced the performance of Phantom lens technology by adding a high contrast filter on its lenses. Available on all Phantom lenses, the high contrast filter boosts colors and significantly enhance your vision. Whether you are on the road or on trails, high contrast lenses will help you to perceive the obstacles.

PHANTOM - PREMIUM OPTICS

MADE WITH NXT®

NXT® technology combines the best of both worlds: the optical clarity of mineral lenses and the light weight and impact resistance of organic lenses. Made with Trivex material, NXT® lenses dramatically enhance your vision. Featuring this technology, our Performance range guarantees the best possible combination of visual acuity, comfort and protection.

MADE WITH nxt®

OPTICAL CLARITY

Whether you are on a bike, a slope or out in the country, perfect vision is crucial if you are to perform at your best. With optical clarity close to that of a mineral lens, our NXT® lenses considerably improve your vision acuity, thus improving hand-eye coordination and intricate motorskills. This enables athletes at every level to employ the technology required to beat the competition.

Traditional lens

NXT® lens

HIGH IMPACT RESISTANCE

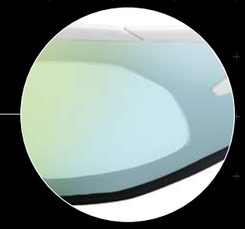
NXT® lenses not only protect you 100% from harmful UV rays, but are also built for maximum impact resistance. NXT® is one of the strongest materials on the market. Originally adapted from military use - jet canopies and helicopter windshields - lenses are subjected to rigorous high-velocity impact tests.

LIGHTWEIGHT

NXT® material is close to the lightest lens material available today, at 14% lighter than polycarbonate. This allows for larger designs with fuller coverage, ultimate protection and utmost comfort.

AVAILABLE IN PRESCRIPTION

Because everyone's vision is unique, our NXT® lenses are available with our B-Thin Technology, suitable for 99% of prescriptions.



HD POLARIZED LENSES

COLOR BOOSTER & GLARE BLOCKER

Bollé introduces a new lens in its sunglasses range for 2019: the HD Polarized lens. Made with polycarbonate, this new lens is a combination of two essential technologies for when the sun is out. HD refers to our contrast-enhancing filter, now available on a great selection of styles. The second ingredient of this lens is polarization technology, which protects your eyes from reflected sunlight. The two components are united in the same lens to create the Bollé HD Polarized lens. You will never have to choose between contrast and polarization again.

HOW DO HD POLARIZED LENSES WORK?

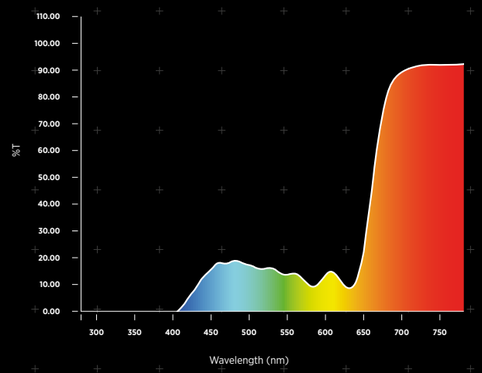
We have infused a specific red pigment into our lenses in order to reinforce the wavelengths of the red color. This solution brings a higher level of contrast and improves depth perception, without altering the base tint of our lenses. Best to use in bright light conditions, HD Polarized lenses will enhance your sport experience whatever the chosen environment.

WHAT IS THE EFFECT ON THE COLOR SPECTRUM ?

The red pigment reinforces the warm colors (red & orange). Red & Orange are the colors we see best as they have the longest wavelengths. That is why we decided to emphasize them, in order to increase contrast and improve your vision.

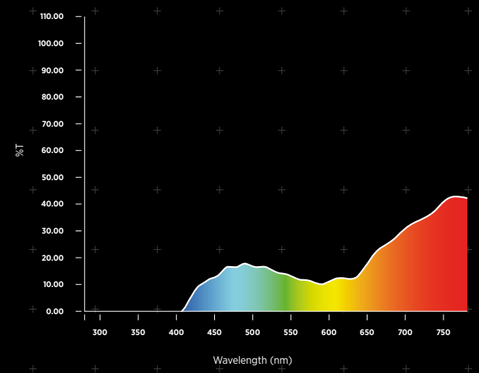
HD POLARIZED TNS

TRANSMITTANCE SPECTRUM



TNS

TRANSMITTANCE SPECTRUM

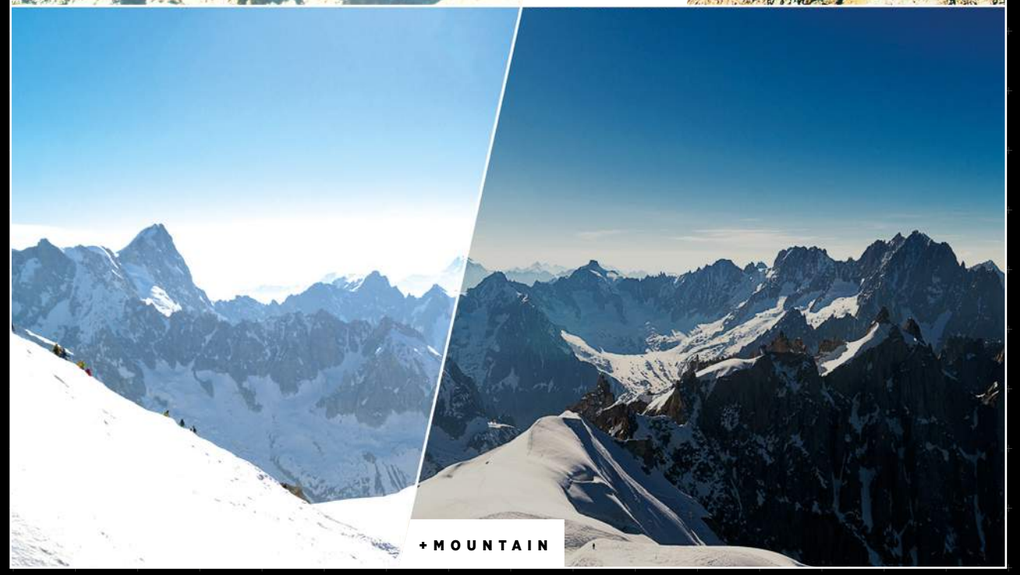


POLARIZATION BENEFITS

Bollé's polarization efficiently filters out 98% of sunlight reflections. By minimizing glare, our polarized lenses reduce eye fatigue and enhance vision clarity to let you enjoy the action all day long.

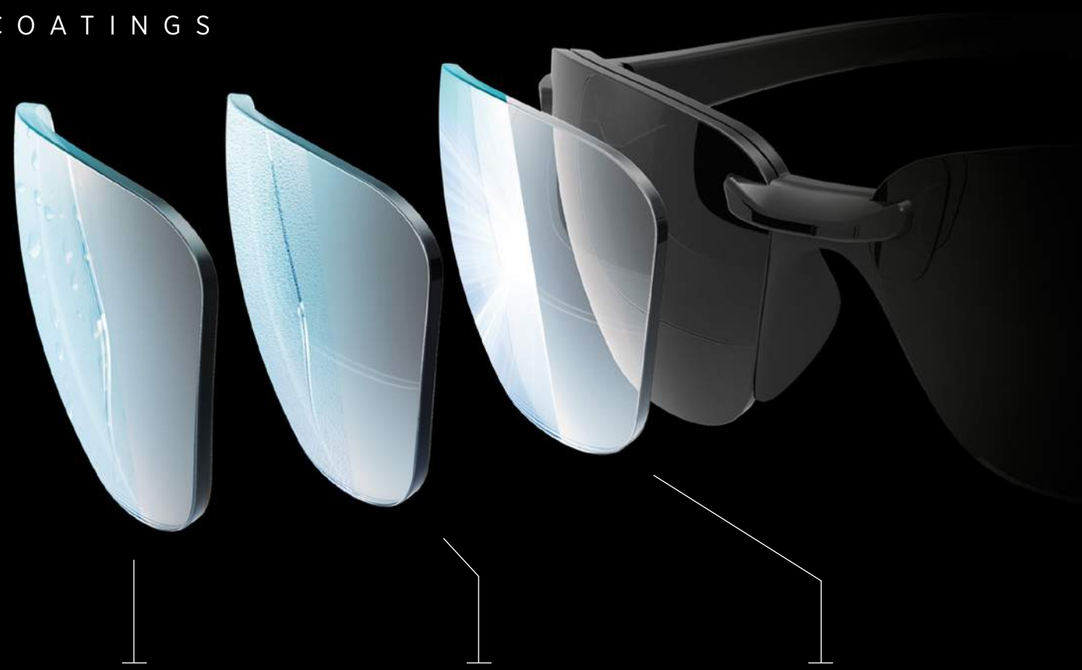
Without polarization

With polarization



OTHER TREATMENTS

TREATMENTS &
COATINGS



OLEO/ HYDROPHOBIC

Our outer oleo/hydrophobic coating makes it nearly impossible for foreign bodies to latch on to your lenses. Available on all Bollé HD Polarized models and Phantom lenses.

ANTI-FOG

Unlike the other anti-fog coatings, our AF coating incorporates permanent resistance to fogging but also scratches and chemicals. The treatment is applied to the lens (no spray, no dip coating) for retained properties even after repeated washing and years of use.

ANTI-REFLECTIVE

Light reflected on the inside of the lenses can harm your eyes. That's why our scientifically-engineered anti-reflective coating is applied to the inside of 6 base HD Polarized Bollé lenses.

FLASH MIRROR COATING: MASTER BOTH SUNLIGHT & STYLE

Improve your look and your vision with a flash mirror lens.
Mirror coating ups your style while reinforcing filtration.

THE BEST CHOICE

Bollé helps you choose what is best for you. With this selection of lenses, you will be equipped with our greatest optics to fully embrace your favourite activity. More lenses are also available in the lens reference.

LENS TINTS by bollé

HOW DO YOU WANT TO SEE THE WORLD?

Bollé lens technology uses 3 different lens base tints to cover the widest range of light conditions, ensuring optimal visual clarity at all times.

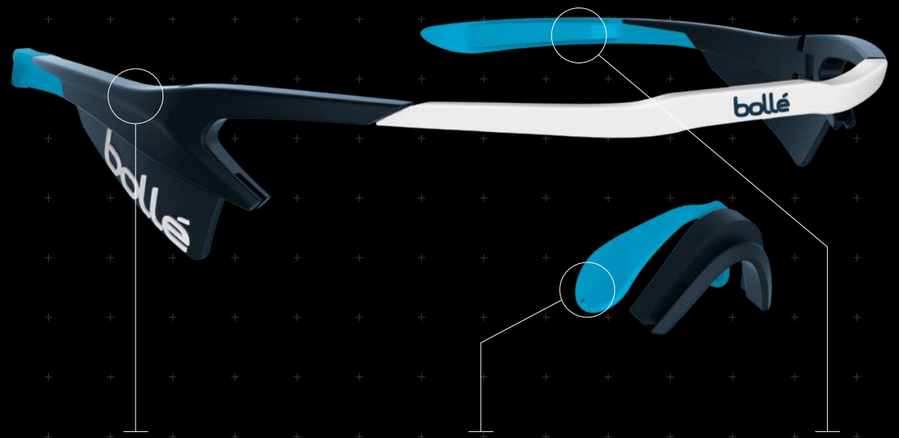
THE COMFORT EQUATION

(ADJUSTABILITY + FIT + GRIP)
⊗
LIGHTWEIGHT
= PERFECT COMFORT



NYLON FRAMES ⊕ **ADJUSTABLE NOSEPIECE** WITH **THERMOGRIP®** ⊕ **ADJUSTABLE TEMPLES** WITH **THERMOGRIP®**

THERMOGRIP®

The temple tips, nose pads and adjustable nosepiece are all made from our proprietary Thermogrip® material. Its hydrophilic properties make it even more grippy when wet, keeping the frames comfortably in place, even during extreme exertion.

ADJUSTABLE NOSEPIECES

The shape and angle of the multi-plane nosepiece can be adjusted to accommodate any nose bridge for a truly custom fit.
NOSE PADS: The hypoallergenic and durable nose pads can be tailored for a custom fit, giving you additional control and comfort.

ADJUSTABLE TEMPLES

The temples can be adjusted which offers a truly tailored fit and the ultimate in comfort.

Team Lizarte

INTERCHANGEABLE LENSES

Bollé® helps you stay on top of your game with this interchangeable lens system. By giving you the flexibility to match the lens to the condition, this system ensures optimum performance for any condition.

NYLON FRAMES

Bollé® uses only the finest grade nylon, resulting in frames that are exceedingly strong, yet lightweight and flexible. No matter how tough the competition, these sunglasses can take it.

REMOVABLE SIDE SHIELDS

Whether magnetic or mechanical, the removable side shields available on Graphite & Cobalt models offer extra side protection from sunlight in extreme conditions.

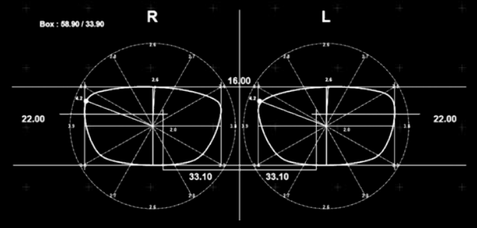
PRESCRIPTION PROGRAMME

A FAST & INTUITIVE WEBSHOP



WHAT IS B-THIN ACTIVE DESIGN TECHNOLOGY ABOUT?

Software using the most advanced calculations is used to create customized lenses and the ultimate in lightweight products. Every prescription is reassessed to compensate for optical distortions related to the frame wrap angle. When the prescription reaches the limits of the conventional digital surfacing method, our patented algorithm calculates the best lens geometry regarding the optical area, the transition zone and reduces the edge thickness (US patent number 8,002,404). Every product is customized to the prescription, frame and wearer's facial metrics, ensuring optimum precision, comfort and frame balance for sports sunglasses.

PERFORMANCE

THE ULTIMATE FIT

With S-curved temples, SHIFTER delivers best-in-class retention and perfect helmet integration. Thermogrip® on end-tips & nose pad provide additional grip on the head, for an ultimate fit.

VENTED LENS

The combination of a 6 base shield for a flat design and 3 strategically-positioned vent holes offers perfect breathability on the SHIFTER. You'll never have to worry about fog again!

TIME TO SHIFT UP A GEAR!

With an expertise of 130 years in the optics industry, Bollé brings back some history in the retro-futurist design of the SHIFTER.
Based on the famous Chrono Shield model, worn by the best cyclists in the world at that time, the SHIFTER is packed with simple yet progressive features to enjoy the ride. Curved temples, vented lens, Phantom lenses, make SHIFTER the natural choice of team AG2R LA MONDIALE.

GREAT COVERAGE

With a large 8 base design allowing a great coverage of your face, GRAPHITE comes with removable and vented injected side shields. Their magnetic system brings additionnal binding to the frame so they don't get popped out.

AVAILABLE WITH PHANTOM

Available with Phantom Black Gun lenses, ranging from Cat.2 to Cat.4, Graphite will protect your eyes in all your climbs.

ON TOP OF PERFORMANCE

The new must-have item on your next expedition check list. GRAPHITE is the definition of Bollé's vision about mountaineering sunglasses. Ideal for medium to large faces, they adapt to any weather conditions thanks to their magnetic & removable side shields. Also available with Bollé's cutting-edge lens technology Phantom, this model can be summarized in 3 words: lightweight, technical, high-protection.

HIGH MOUNTAIN LENSES

Specially developed for high-altitude use, the Bollé 100 Gun lens offers Cat.4 protection, eliminating distracting glare. By filtering 95% of visible light and amplifying color contrast, it delivers better vision on the snow. Take a moment to admire the view on top of the world with GRAPHITE!

AVAILABLE SPRING 2019

GRAPHITE

FIT: LARGE • 8BASE 63/47/17/116

Bollé brings mountaineering back to the range. Go beyond your limits with GRAPHITE and reach new heights. Ergonomy, ventilation, protection, this glacier style has all it takes to endure the most extreme experiences without any compromise.

NEVER LOSE IT AGAIN

Never lose your sunglasses again: Bollé brings new floating technology to its outdoor range. Derived from ones of our most popular lifestyle models, BRECKEN & HOLMAN have been paired with innovative floating features for those not afraid to get wet. Designed to stay afloat whether you are in the sea, on a lake, or in a pool, you'll never lose your shades again with this floatable BRECKEN & HOLMAN version. Air bubbles inside the temples for BRECKEN, or full temple construction in buoyancy material for HOLMAN, both styles come standardized with Bollé's first class HD Polarized lenses. Key features also include an oleo/hydrophobic coating to keep water drops away, and an anti-reflective treatment efficiently blocking the sun's glare.

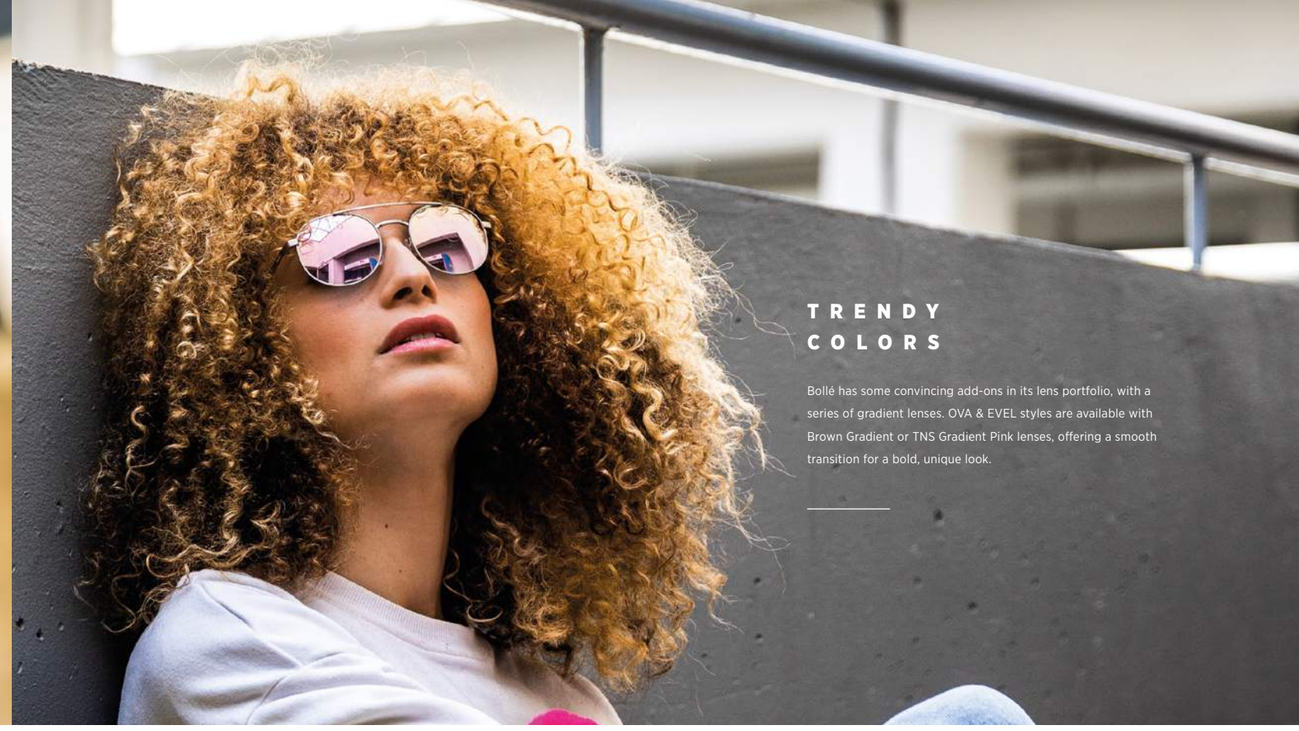
LIFESTYLE

AVAILABLE WITH PHANTOM AND HD POLARIZED LENSES



TRENDY COLORS

Bollé has some convincing add-ons in its lens portfolio, with a series of gradient lenses. OVA & EVEL styles are available with Brown Gradient or TNS Gradient Pink lenses, offering a smooth transition for a bold, unique look.

TRENDY METAL

For 2019, Bollé launches a new Metal Family. Rectangular style, aviator or round style, all paired with trendy flash mirrors, will make it even more difficult to choose! Offering Bollé's best-in-class optics, some styles are also equipped with Phantom lenses and HD Polarized lenses for maximum protection in every situation. Be ready to look as good as what you're seeing from your side!

NAVIS

FIT: LARGE • 6BASE 57/44/18/135

Rectangular shape for this large fit piece, NAVIS is a mix of optical originality with a touch of modern class.
